THE COMPANY - SINCE 125 YEARS!

From this... (in 1900)

But in 1900, 'start ups' were not quite what they are today, and there certainly wasn't as much freedom or choice. However, company founder Mathias Wiemann was soon having to open a larger workshop, and acquiring his first machinery put him firmly on the path to slow but consistent growth, resulting in the company of today's size and presence.

The former inn is now an area of 98,000 m², of which 48,000 m² contain the production, administration and storage facilities.

Around 600 people are employed – it's the second largest employer in the town of Osnabrück in Northern Germany. Wiemann is still privately owned by the family: at the helm today is the founder's great grandson, Markus Wiemann, who took over from his father in 2005.

Wiemann today is one of Germany's leading bedroom manufacturers, specialising in semifitted collections in both modern and traditional styles. Every day, between 400 and 500 bedrooms are put on the road to destinations throughout Europe and beyond.

... To this (today)

Wiemann bedroom furniture is manufactured to the highest standards in its highly mechanised, very efficient factory, which is accredited to the international quality management assurance standard ISO 9001: 2000. Products are also approved under the German BQ quality mark scheme.

The specifications are surprisingly high in relation to the price. Panels are made from 15/18 mm thick first class chipboard

and wrapped in top quality printed foils using the latest printing technologies available, so all our wood finishes look and even feel incredibly realistic. Every day eight truckloads of high quality particle board are used to make 10,000 individual components, which are then used to make specific orders. We do not keep stock as this could increase the risk of damage.

Wiemann make over 200 ranges of bedroom furniture for markets all over Europe.

We have selected what we feel are the most suitable for British tastes – but they all have a distinctive European style. A varied design policy that can adapt almost instantly to changing market requirements is the foundation on which the company's present role is based.
